

Merino mobile touch

Art no. **MW-6501-99**

Size: S-XXL
Material: 100% Merinoull
Packaging: 12/240

Sheep wool

Properties

Merino wool is quite different from other types of wool since the merino sheep lives in demanding environments where adaptation to the climate is a must to survive. The wool fibre adapts itself to different temperatures resulting in an even and comfortable warmth during cold weather and cools down the wearer during warm weather. Merino wool is also gentle to sensitive skin preventing irritation common in other types of wool. Since the merino wool fibre is shaped like a spring it is very flexible and stretches to follow any hand no matter the shape.

Material information

The gloves are woven in 100% merino wool.

Teknisk fakta

The CE standard EN 420 defines general requirements for protective gloves. This means that this standard sets out general requirements such as: suitability, design, product information, sizes, chromium content (max 2 mg Chromium VI per kg) and pH value in the range of 3.5-9.5
